Made and **tested in the UK**

We make the Evopure range ourselves. After every production run, bottles are picked at random and sent to an ISO/IEC 17025–accredited laboratory for a full cannabinoid profile before the batch is released. The certificate for the batch you stock is yours on request.

“We don't test to find out whether a batch is good. We test to prove what we already know.”

HASEEB, CEO

Our CBD products are on the FSA public list of CBD products (validated application). Being on the list is not an authorisation.
